Drinking Water Testing

The Elkhart County Soil and Water Conservation District participates in Heidelberg College's well water testing program. The lab is located in Tiffin, Ohio. If you can wait **6-8 weeks for results** their program is relatively inexpensive. To participate you select the test you want done, write a check to Heidelberg College and take the check to the SWCD. They will give you the kits to collect your water sample. You collect the sample, send it to Heidelberg, and wait for the results. For more information, contact the SWCD at:
